

Joe Novak of Mark Wanagard. ↗ Moon Lake Water Users Assoc.
Whitrocks Irrig. Co.

Ouray Park Irrigation Co.

Errors in priority for Brough & Cottonwood.

limit 1933 priority to Pelican Lake.

* A 9670 orig app. filed in late 20's for 20,000 AF storage in Pelican Lake diversion from Whitrocks River. approved ^{May 19} ~~1926~~ condition - segregate 10,000 AF for diversion from Untah River.

May 19, 1976 → 50 yrs. period expired

increased ability to store
change constructed an enlargement or priority of right
must of junior
to reduced to Feb 1973

{ Ouray Park ~~████████~~ filed change a7300 on Feb 6, 1973
to store 4,000 AF (out of 16,000 from W.R. River)
in Brough Res.

WhiteRocks A35504 Aug 8, 1963

Moon Lake W.U. filed change app. on 42 ac. of 62 storage in Browns draw.

at the time these two were filed the states of the records showed. Ouray Park limited to storage in Pelican Lake Reservoir. so)

did divisions change in this period of time. (after Brough Res. was constructed).

April 1976 Ouray Park filed election on its filing ~~████████~~ legal effect - development of ~~████~~ storage and land to be irrigated is completed.

election filed - Pelican Lake capacity 11,850 AF.
A 9684 filed on 6/9/1980 and subsequently
an election was filed on the change.

illegal procedure → should be limited to 11,850 AF
+ 4,000 AF.

At least Cottonwood Storage Priority should be ~~6/9/80~~
9/28/1977

Depots in Duray Park Filings

1933 A 9670a reg. 10,000 from A 9660.
A 9670 lapsed

- request for reinstatement only on A 9670 did not include A 9670a but S.E. allowed A 9670a to be reinstated also. - S.E. made an error.
- request for reinst. on A 9670 filed 62 day after notice of lapsing - although statute at that time didn't have 60 day requirement

White Rock's right to store

has other pending change applications to store working on them A 35504 to divert S of should read 8/08/1903

Moon Lake = Browns Draw Res.

should be able to store under its 1910 priority during those periods when the water could otherwise be beneficially used by direct flow diversion. Shouldn't make any difference to downstream storage if water is

being diverted to ~~irrigation~~ irrigation or to storage instead of irrigation. To the extent it can, Moon Lake should be permitted to make better use of its water rights, should be able to store instead of irrigate (if it could irrigate) if it so chooses.

If water cannot be beneficially used by direct flow then priority should revert to 1964

Cottonwood → another reason why priority should be reduced.

Change app. shows 2 purposes.

- feel this
constitutes
an enlargement.)*
- 1- permit storage in Cottonwood when because of icing water could not be conveyed the 15 miles to Pelican Lake.
 - 2- Provides means of delivering water by gravity to areas above Pelican Lake (eliminates pumping from Pelican).

Willard Wall. (ex Pres. of Alray Park).

- applications were made either/or
- realized they had to get a lot of storage during high water.
- storing water cleaned it and made it mandatory to go to sprinkling. (couldn't get clean water over land ^{by flood}).
- to go to sprinklers needed longer period of irrigation
- during time Joe was discussing they were dual filling reservoirs - encourage people to start irrigating

~~the~~ on April 1 then recharging res. from high water
so double filling Brough & Pelican.
study showed very few years ^{2000 AF} data was available without storing during
high water.

(2)

Hood Bullock Draw - transferred that rights to Cottonwood.

Haven't enlarged rights - just stretched it out over
longer period of time.

→ 1948 Rec. Co.

10 Cfs, 1300 AF

To add fish culture as a purpose,
inc. capacity to 1017 AF³

undated, unsigned agreement.

Wildlife Resources of Ouray Park Inv Co.

- sold Bullock Res. to DWR
- company agreed to provide inflow water to offset evaporation, transpiration & seepage losses & for circulation flows.
- company agrees to refill res. if it is drained for repairs
- company to fill appropriate storage app. to allow conservation pool & maintain water levels.
- agreement is a permanent encumbrance on 918 AF in Bullock Res.
4500 AF in Pelican Lake Res.
